

Windows Firewall Guided Activity

Objective: You will be opening ports to grant access to users to your FTP server.

Steps:

- Go into the Control Panel and open Windows Defender Firewall
- Click on the Advanced Settings option on the left
- Under Inbound and Outbound Rules, open TCP ports 20 – 21
 - This is done by clicking on New Rule on the right side
 - Then clicking on Port
 - Print Screen the results for BOTH Inbound and Outbound
- Once this is done, you will test the connection to the FTP Server
- Print Results of a successful connection
